

TECHNOLOGY ENABLED PROGRAM MANAGEMENT FIRM BUILT FOR UTILITIES

Project Management | Distribution Design Engineering | Program Management

Caliber closes the gap between what utilities need to modernize and what they can do on their own. We deliver project management, distribution design engineering, and program management under one operating model, with active expansion into substation and transmission. Our PMs are engineers first. Our methodology is embedded in software, not spreadsheets.

50+

Experienced utility professionals

100+ years of collective utility leadership

1,000+

Projects under management

Including 180+ EV sites energized

2023

Anchor utility client since

MSAs with leading national utility engineering and renewable energy companies

MBE

NMSDC certified

CORE COMPETENCIES

Engineer Led Project Management. Our PMs are engineers first. Sharper calls on design quality, constructability, and field execution.

Programmatic Delivery. Individual projects scaled into repeatable programs that improve cost efficiency and predictability.

Financial Management. Full transparency budgeting, forecasting, and variance control. Clients always know where every dollar goes.

Data Driven Governance. Live dashboards, verified field data, and digital tracking to sequence work and measure performance.

Safety and Quality Leadership. KPI driven QA / QC embedded into delivery, with bonus tied to safety and performance metrics.

Schedule Credibility. Eighteen month rolling schedules, proactive permit and paving coordination, and realistic buffers.

WHY CALIBER

Engineer led, not contractor led. Our PMs are engineers who understand utility design standards from the inside out.

Speed of learning. We absorb client process and operate inside it faster than traditional contractors.

Technology embedded, not bolted on. Our methodology runs on proprietary software, not spreadsheets.

PAST PERFORMANCE

LARGE MIDWEST INVESTOR OWNED UTILITY

New Customer EV Program

180+ sites energized · 1,000+ charging ports · 150 sites underway 2026

Preferred program management partner for a major utility's EV rollout initiative. End-to-end delivery spans infrastructure project management, customer management, and design engineering, transforming the program into a data-driven, scalable operation. Program earned the client a national Top Innovator in Electrification Award, where Caliber played a pivotal role.

LARGE MIDWEST UTILITY / MUNICIPAL BIKE SHARE OPERATOR

Underground Service Connections Program

21 sites completed (2025) · 80 sites underway (2026)

Project management contractor of choice for underground service connections to a large urban bike share network. Scope: customer engagement, city's underground coordination (OUC), distribution design engineering, permitting, and construction management.

LARGE MIDWEST UTILITY

New Business Portfolio Project Support

1,000+ projects · 7 departments · active since 2023

Financial forecasting, cost tracking, and program management across a major utility's new business portfolio. Coverage spans distribution design engineering, field operations, program controls, municipal OUC review management, and service request processing.
